The Connected Workplace

 MEETING ROOM SCHEDULING

In today's hybrid workplace, people come and go on different schedules.

To keep everyone working efficiently and productively, it's essential to integrate room scheduling into your workplace design.

 CLOUD-BASED MANAGEMENT

Set up once, scale as needed via Crestron's XiO Cloud® technology operations management platform.

- Remotely control any touch screen
- Automatic software updates
- Wide-scale deployments in minutes vs days

 FULLY INTEGRATED

Rendezvous is the platform that connects your staff, colleagues and visitors to deliver a perfect meeting and workplace experience.

Rendezvous & Crestron: Your Partnership for Perfect Meetings

Rendezvous / Crestron Integration

NFS has worked with Crestron to develop a native touch panel application that supports the entire meeting room management process, with features such as: room availability indicators, smart booking, check in/out, and even no-show tracking – which can help organizations better manage their meeting rooms by reverting rooms back to available for no-shows.

Crestron Meeting Room Technology

Crestron's TSS-7 and 10-inch room panels arrive out-of-the-box running the NFS Rendezvous meeting room application which offers an affordable solution for many companies seeking better display technology, without any compromise in functionality or security. And it goes without saying that Crestron offers the best and most reliable hardware in the industry, so you can rest assured that your investment in NFS and Crestron will provide the best user experience and return-on-investment for years to come.

But this is integration is more than a panel solution. It also includes integration with innovative room availability indicators to suit many different client aesthetic preferences.

Crestron XiO Cloud® Platform

Access all your workplace technology in one place.
From personal spaces to lecture halls, lobbies to lounges, esports to video walls, you can see and control all your digital workplace and content distribution technology - everywhere.

Manage All Device Lifecycles
Save time, increase room uptime, and mitigate risks

- Manage individual, groups, or all devices at once
- Deploy standard room configurations
- Remotely push firmware and software updates

A Deeper View of Your Technology
*Utilized for more effective planning and budgeting*

- Automatically collect room and device usage data
- Understand usage, frequency of use, and connectivity
- Generate reports

NFS Rendezvous Turn-Key Solution Bundle

Our Rendezvous ecosystem bring together all elements of the new digital workplace, from meeting room management to dealing with Visitors and Services like catering. In conjunction with Crestron, we are now able to offer clients the room panels and related devices to create a perfect meeting experience, from booking the room to check in.

Crestron and NFS have created complete hardware/software bundles that include 7" or 10" room panels, in either **black or white**, including an integrated lightbar and mounting bracket. And the Crestron room panels arrive ready to deploy. The Crestron TSS range is also very affordable starting at $858 for the 7" panel. Once installed, simply log onto the application, and start managing your meeting rooms.
